CIRCULAR LETTER NO. 91

Rescission of Par 6, Sec II, Cir Ltr No 20 dtd 2 Feb 1944 - - - Section I
Amendment of Cir Ltr #78, dated 6 Nov 1945 - - - - - Section II
Amendment of Cir Ltr #69, dated 28 Sep 1945 - - - - - Section III
Item C 1C9160 Hydrogen Peroxide Tablets, 1.06 m., unit, tablet- Section IV

SECTION I. RESCISSION OF PAR 6. SEC II. CIR LTR NO. 20 DATED 2 FEB 1944.

1. Effective 1 January 1946, Paragraph 6, Sec II, Circular Letter 20, Office Chief Surgeon, 2 February 1944 is rescinded, and the following procedure is promulgated.

2. Report of Medical Department personnel after 1 January 1946 will be reported on WD AGO Forms Nos. 8-19 and 8-164, if available; otherwise, these forms will be reproduced. Monthly Statistical Report Form 86c will not be used as a substitute after 1 January 1946. Instructions for the preparation and submission of WD AGO Forms Nos. 8-19 and 8-164 are stated in Circular 286, WD, dated 10 July 1944.

3. By the third day of each month, units preparing WD AGO Forms Nos. 8-19 and 8-164 will submit the original to Base Section Surgeons, Surgeons of Divisional Corps (for Corps Troops only), Army Surgeons, Air Force Surgeons, or other appropriate major command for consolidation; one copy direct to the Office of the Theater Chief Surgeon, APO 757; and one copy direct to the Surgeon General's Office, Attn: Chief of Personnel Service, Washington, (25), D.C. Consolidation by major commands will be accomplished so that consolidated reports will arrive in the Office of the Theater Chief Surgeon not later than the 12th of the month. Classification of forms will be "RESTRICTED".

SECTION II. AMENDMENT OF CIRCULAR LETTER #78. DATED 6 NOV 1945.

Par 4, Circular Letter #78 is amended to include the 110th Station Hospital, Vienna, Austria, APO 777.

SECTION III. AMENDMENT OF CIRCULAR LETTER #69. DATED 28 SEP 1945.

1. Par 3 a. (2) and (3) is amended to read as follows:

"(2) Dosage:

(a) 40,000 to 60,000 units will be given as soon as the clinical diagnosis is made.

(b) A second dose of 40,000 units will be given eight hours later.

(c) In severely toxic patients and those with extensive membranes additional doses of 20,000 to 40,000 units are advisable at eight hour intervals until definite clinical improvement is manifested.

(d) The clinician must use his individual judgment for each patient and vary the recommended dosage accordingly.

(3) Administration will be by the intramuscular route, the lateral muscles of the thighs being the site of choice. Rarely and only in extremely toxic cases the injection of the first dose of antitoxin by the intravenous route may be necessary."

2. Footnote on page 5 of Cir Ltr #69 is rescinded and the following substituted:

"Tellurite media is available upon requisition from the Fourth Medical Laboratory, APC 758."

SECTION IV. ITEM NO. C 109160 HYDROGEN PEROXIDE TABLETS, 1.06 m., UNIT, TABLET.

1. Subject item is now available for issue to all units.
2. One (1) tablet, when placed in ten (10) cc of distilled water will yield approximately 3% Hydrogen Peroxide Solution.

By order of the Theater Chief Surgeon:

Daniel J. Maligora
DANIEL J. MALIGORA
Colonel, Medical Corps.
Executive Officer
